

### Why should students read during the summer?

University of Tennessee, Knoxville, faculty members Richard Allington and Anne McGill-Franzen have completed a three-year study showing that students lose up to three months of learning every summer—skills they worked hard to acquire during the school year.

However, the study showed a significantly higher level of reading achievement in students who took part in summer reading at home.

Allington compares the slide in reading ability to an athlete's fitness. "Just like hockey players lose some of their skills if they stay off their skates and off the ice for three months, children who do not read in the summer lose two to three months of reading development," Allington said.
